

Table of Contents

1.	Introduction to the Federal Radionavigation Plan	1-1
1.1	Background.....	1-1
1.2	Purpose.....	1-3
1.3	Scope.....	1-3
1.4	Objectives	1-4
1.5	Practices and Procedures	1-4
1.6	Radionavigation Systems Selection Considerations	1-5
1.7	Federal Policy on the Radionavigation System Mix	1-6
2.	Radionavigation System User Requirements	2-1
2.1	Civil Radionavigation System Requirements	2-2
2.1.1	Process	2-2
2.1.2	User Factors	2-2
2.2	Civil Air Radionavigation Requirements	2-3
2.2.1	Phases of Air Navigation.....	2-3
2.2.2	General Requirements for Aviation Navigation Systems.....	2-4

2.2.3	Navigation Signal Error Characteristics	2-6
2.2.4	Current Aviation Navigation Accuracy Requirements for Phases of Flight	2-6
2.2.5	Future Aviation Navigation Requirements	2-11
2.3	Civil Marine Radionavigation Requirements	2-13
2.3.1	Phases of Marine Navigation.....	2-13
2.3.2	Current Marine Navigation Requirements.....	2-14
2.3.3	Future Marine Navigation Requirements	2-20
2.4	Space Radionavigation Requirements	2-21
2.4.1	Space User Community.....	2-21
2.4.2	Space User Community Application of GPS	2-22
2.4.3	Current Space Radionavigation Requirements	2-22
2.5	Civil Land Radionavigation Requirements	2-24
2.5.1	Categories of Land Transportation.....	2-24
2.5.2	Current Land Transportation Requirements.....	2-26
2.6	Requirements for Non-Navigation Applications	2-28
2.6.1	Geodesy and Surveying.....	2-29
2.6.2	Mapping, Charting and Geographic Information Systems (GIS).....	2-29
2.6.3	Geophysical Applications	2-29
2.6.4	Meteorological Applications.....	2-30
2.6.5	Time and Frequency Applications.....	2-30
2.6.6	Summary of Requirements	2-31
2.7	Military Radionavigation Requirements	2-32
2.7.1	General Requirements	2-33
2.7.2	Service Requirements.....	2-34
3.	Radionavigation System Use	3-1
3.1	Existing Systems Used in the Phases of Navigation.....	3-1
3.1.1	Air Navigation	3-2
3.1.2	Marine Navigation	3-4
3.1.3	Space Applications.....	3-4
3.1.4	Land Navigation.....	3-5
3.1.5	Uses Other Than Navigation	3-5
3.2	Existing and Developing Systems - Status and Plans	3-6
3.2.1	Global Positioning System (GPS).....	3-6
3.2.2	GPS Modernization	3-8
3.2.3	Interference Testing Coordination	3-9

3.2.4	Augmentations to GPS.....	3-10
3.2.5	Loran-C	3-16
3.2.6	VOR and VOR/DME	3-17
3.2.7	TACAN	3-19
3.2.8	ILS	3-20
3.2.9	MLS	3-22
3.2.10	Aeronautical Nondirectional Beacons (NDBs).....	3-22
3.2.11	Maritime Radio Beacons.....	3-23
3.3.	Phase-Down of Ground-Based Aeronautical Navaids	3-24
3.3.1	Transition to Satellite-Based Navigation (Satnav).....	3-24
3.3.2	Satnav as an Only Means of Radionavigation	3-27
3.3.3	Mitigation of Potential Satnav Disruptions	3-28
3.3.4	Long-Term Transition Plans	3-29
3.4	Interoperability of Radionavigation Systems	3-30
3.4.1	Overview	3-30
3.4.2	GPS/GLONASS	3-30
4.	Radionavigation System Research and Development Summary.....	4-1
4.1	Overview	4-1
4.2	DOT R&D	4-2
4.2.1	Civil Aviation.....	4-2
4.2.2	Civil Marine	4-6
4.2.3	Civil Land	4-6
4.3	NASA R&D.....	4-9
4.4	NOAA R&D	4-10
4.5	DOD R&D.....	4-10
A.	Appendix A. U.S. Government Agency Radionavigation Roles and Responsibilities.....	A-1
A.1	DOD Responsibilities	A-2
A.1.1	Operational Management	A-3
A.1.2	Administrative Management	A-5
A.2	DOT Responsibilities.....	A-5
A.3	DOD/DOT Joint Responsibilities	A-9
A.4	Department of State Responsibilities.....	A-10

Appendix B. Radionavigation Systems Selection Considerations	B-1
B.1 Background and Approach.....	B-1
B.2 Operational Considerations.....	B-2
B.3 Technical Considerations.....	B-3
B.4 Economic Considerations	B-4
B.5 Institutional Considerations	B-4
B.6 International Considerations	B-7
B.7 Radio Frequency Spectrum Considerations.....	B-7
 Appendix C. System Descriptions	C-1
C.1 System Parameters	C-1
C.1.1 Signal Characteristics	C-2
C.1.2 Accuracy.....	C-2
C.1.3 Availability.....	C-3
C.1.4 Coverage	C-3
C.1.5 Reliability.....	C-3
C.1.6 Fix Rate	C-3
C.1.7 Fix Dimensions	C-4
C.1.8 System Capacity.....	C-4
C.1.9 Ambiguity	C-4
C.1.10 Integrity.....	C-4
C.2 System Descriptions	C-4
C.2.1 GPS	C-4
C.2.2 Augmentations to GPS.....	C-7
C.2.3 Loran-C	C-21
C.2.4 VOR, VOR/DME, and TACAN.....	C-24
C.2.5 ILS	C-30
C.2.6 MLS	C-33
C.2.7 Aeronautical Radio Beacons	C-35
C.2.8 Maritime Radio Beacons.....	C-37
C.3 Navigation Information Services.....	C-39
C.3.1 USCG Navigation Information Service.....	C-39
C.3.2 GPS NOTAM/Aeronautical Information System	C-40
 Appendix D. Datums and Reference Systems	D-1
D.1 Datums	D-1
D.2 Geodetic Reference Systems.....	D-1
D.3 Geoid	D-2

D.4	Land Maps	D-2
D.5	Nautical Charts.....	D-2
D.6	Aeronautical Charts.....	D-3
D.7	Map and Chart Accuracies.....	D-3
D.8	Electronic Chart Display Information System (ECDIS).....	D-4
	Appendix E. Definitions	E-1
	Appendix F. Glossary.....	F-1
	References	R-1
	Index	I-1
